**New, HEPA-CARE® Deluxe Room Pressure Monitor
From Abatement Technologies.**

Suwanee, GA---4/02: Abatement Technologies has announced the availability of a new, multi-featured Room Pressure Monitor, the *HEPA-CARE* HCRPM-2DX model.

It is designed to continuously monitor the differential air pressure within airborne infectious isolation rooms, relative to the common areas of a hospital or other healthcare facility. Applications include: TB & HIV Isolation Rooms; Operating Suites; ICU & ER Rooms; Hospital Labs and Bone Marrow Suites.

Abatement’s engineers incorporated the latest in microchip technology in the design of the HCRPM-2DX to ensure that it delivers a superior level of performance, reliability and accuracy. It is an instrument that will produce consistent, accurate measurements that you can trust.

Features include: Energy Efficient, Low Voltage Operation; Large Easy-to-Read LCD Display with Readouts to 0.0001” w.c.; Easy-Set Alarm / 3 Minute Delay; Auto Calibration; Non-Volatile Memory. Installation is simple, via a 3-point wall mount.

The HCRPM-2DX weighs just 2.17 lbs, with a polycarbonate case and smoked gray polycarbonate cover with reversible hinges.

Two options are available: an upgrade for a LAN connection and a nurses’ station alarm.

Abatement Technologies is located in Suwanee, Georgia. Its *HEPA-CARE* Air Filtration Systems are now in use in over 1,000 healthcare facilities throughout the USA and Canada.

For more information, call 800-634-9091 or visit the *HEPA-CARE* web site: www.hepacare.com
