

DUCT-PRO. POWER ROD SYSTEM

Increase Your Productivity & Profit

The new Duct-Pro Power Rod System from Abatement Technologies is an agitation device, as well as a compressed air tool, that will provide fast, high-quality cleaning in a variety of duct cleaning applications.

The PRS can be used in place of brushes and Aire-Sweeps® in many situations. Three different rod flexibilities provide almost unlimited options for cleaning all configurations and types of ductwork. Because of their flexibility, the rods can be directed where needed and can be used for long runs....even runs over 100 feet! That means you can access those difficult-to-reach, time consuming duct sections. Forward and reverse nozzles deliver air blasts where conventional Aire-Sweeps simply cannot reach.

Compressed air is constantly blasted through the rods, causing a “whipping” action over every inch of the ductwork. Cleaning different types and sizes of ducts is much easier, because you can choose a whip head to meet a specific need.

Fittings and nozzles are made of solid brass for durability. Rods, nozzles and whip heads are all easily and securely connected by quick connects, so adding rods or making head changes is a snap. All nozzles and heads fit through 1” access holes.

The Power Rod System will save you time and frustration.... and increase your profits.

Duct-Pro Power Rod System Includes:

- › 3-5' Low-Flex Power Rods
- › 3-5' Medium-Flex Power Rods
- › 3-5' High-Flex Power Rods
- › Sturdy Rod Case
- › Forward & Reverse Nozzles
- › Single-Whip Power Rod Head
- › Three-Whip Power Rod Head
- › Eight-Whip Power Rod Head
- › 6' Airline with Hand Control Valve
